

Introducing the

# GROUNDSMAN

# Turf managers choose SCUD products for:

## Simplicity

Our products are easy to install and operate, allowing for foolproof chemical handling without ever compromising on safety.

## Efficiency

When it comes to mixing and handling your agricultural chemicals efficiently and safely look no further than SCUD. Our products provide you with one place to do all of your chemical mixing in a closed circuit. Minimising your time spent measuring and mixing, leaving you with more time to do what you do best.

## Safety

Safety is something we take very seriously here at SCUD. Our products combine to form a single chemical handling system, nullifying the risk of chemical spillage and mitigating the environmental impact for you, your team and your business.

## Affordability

Efficient products don't have to equate to exorbitant prices. Our products are built with simplicity and durability in mind, meaning you get safer and quicker chemical handling that doesn't break the bank.

## Durability

Our products are made in Western Australia from materials sourced locally, from quality suppliers and built to last in Australia's harsh conditions.

# Simpler, safer chemical handling

SCUD products are designed to make the handling and mixing of chemicals safer for your grounds team.

**The Groundsman is  
perfect for any business  
looking to decrease downtime  
and increase productivity.**

Its main purpose is to transfer and mix liquid or granular chemicals before transferring them into a sprayer, ready for application. It does all this within a closed system, meaning ZERO spillage, and filling times are reduced by more than half so you can rest assured that your operators will be safe.

# Some key benefits the Groundsman provides:

## Speed

The Groundsman's pump can fill at speeds of 350 litres per minute and is capable of filling a 3000-litre sprayer in less than 10 minutes.

## Mobility

The Groundsman can be moved easily from job to job. The Royal Sydney Golf Club is already benefiting from this, using our Groundsman to control the pests that like to hang out on their immaculate greens.

## Minimal Environmental Impact

Through the use of dry couplings (Micro-Matic fittings), the Groundsman can facilitate no pour chemical induction in a closed system. Our Envirodrums are reusable, saving thousands of plastic drums from ending up in landfills each year.

## Safety

Quick fill times mean chemicals have less chance of being mishandled, improving overall safety. Our closed chemical mixing system vastly reduces the risk of spillage and chemicals coming in contact with you and your team.

# How does the Groundsman stack up against other chemical handlers on the market?

- ✓ The best and fastest granule mixing capacity on the market
- ✓ Fast fill from IBC's at 200 litres per minute at the flick of a tap
- ✓ The SCUD introduces a system that will improve the safety and speed of your filling process
- ✓ Manufactured in Australia

## Why the Groundsman?

- ✓ 100% Australian owned
- ✓ Closed chemical mixing system
- ✓ Unrivalled safety and OH&S
- ✓ Affordable
- ✓ Knowledgeable team
- ✓ Safe and simple to use

# Product Specifications

<b>Groundsman</b>		
<b>Model number</b>	SG150E450	SG100E180
<b>Length (mm)</b>	900	700
<b>Width (mm)</b>	650	600
<b>Height (mm)</b>	1200	1200
<b>Weight (kg)</b>	55	45
<b>Capacity (L)</b>	150	100
<b>Pump flow (L/min)</b>	360	180
<b>Pump types</b>	Electric 240 volt	Electric 240 volt
<b>Pump motor</b>	1.5 Hp 1.1 KW	0.75Hp 0.55 KW
<b>Electrical draw</b>	10 Amp	10 Amp
<b>Cord length</b>	1.8m	1.8m
<b>Fitting size</b>	1 1/2" (40mm)	1" (25mm)
<b>Tank calibration</b>	5L Outside 1L Inside	5L Outside 1L Inside
<b>Recirculation</b>	Yes	Yes
<b>20L Drum washer</b>	Yes	Yes
<b>Waterfold granule mixing</b>	Yes	Yes
<b>Wheels/Skid</b>	Wheels	Wheels
