

Introducing the **SCUD MIXERS**

The benefits of the SCUD Mixers

Speed – Can induct liquid product at up to 300L/min.

Simple plumbing using 3-way ball valves – Easy to operate, easy to clean out.

Size of an IBC – the 350 Mixer has the footprint of an IBC so easy to work around in a confined space.

Waterfold granule mixing – Great agitation using the “waterfold” mixing action.

Safety – This machine stops your staff climbing onto the sprayer to fill, can all be done at ground level.

1" chemical suction probe/micromatic coupler - Suction at 40ltrs/min.

Light weight - the 350 Mixer only weighs 60kg.

Drum washer – For triple rinsing drums from 1- 20 ltrs.

SCUD pump kit ready - SCUD pump kit can be retro fitted.

Size range - we offer the SCUD Mixers in a range of sizes, being 350L, 500L, 800L and 1000L.

Motor options - all sizes can be built with a petrol or electric motor.

The features of the SCUD Mixers

SCUD tank rinse

2" chemical suction

2" fresh water suction

1" chemical suction
For probe/micromatic coupler with suction at 40ltrs/min

SCUD discharge tap

Drum washer

Waterfold mixer

Internal scale

Having a internal scale up to 80ltrs helps with measuring small quantities of liquid with out using jugs (however if less than 1ltr we recommend using a jug).
